WARNINGS

- Not suitable as sole source of nutrition
- · Must be used under medical supervision
- · Not to be used by non-PKU/HPA individuals
- · For adults and children aged 8 years and over with PKU/HPA
- · Not suitable for parenteral use

SANEA PKU Advance Formula is a phenylalanine-free formula. It consists of a phenylalanine-free amino acid mixture and carbohydrates, and is supplemented with minerals, trace elements and vitamins

Indication: For the dietary management of Phenylketonuria and Hyperphenylalaninemia in persons aged 8 years and over.

Preparation:

- 1. Weigh out the needed amount of powder with the scoop.
- 2. Pour the required volume of water or other desired liquid into a container.
- 3. Add the powder and stir well, until the powder is completely dissolved.

This product can also be used to enrich beverages or foods like juices or tea.

Recommended dosage: The daily amount depends on age, body weight and individual metabolic condition. The dosage of SANEA PKU Advance Formula is to be monitored and adjusted by the physician regularly.

Lot number/Best before:

see bottom of can

Standard dilution: 15g of powder (2 Scoops) into 90ml

Use: The daily amount of SANEA PKU Advance Formula required should be divided into 3 to 5 single portions (prepared with water according to instruction) and should be taken together with calculated amounts of other food. To meet the daily protein need, this formula can also be combined with SANEA PKU Advance Concentrate. Diet must contain adequate amounts of energy, essential fatty acids and phenylalanine to meet daily requirements.

Note:

- The leftover product should be discarded one hour after reconstitution. The product does not need to be reheated.
- The powder is not sterile.
- Take care of your children's dental health, especially before bedtime.

Store in a cool, dry place, away from light. Always close the can after use. Once opened, use within 1 month. Packaged in a protective atmosphere.
