

- WARNINGS:**
- Not suitable as sole source of nutrition
 - Must be used under medical supervision
 - Not to be used by non-PKU/HPA individuals
 - For infants with PKU/HPA
 - Not suitable for parenteral use
 - Not to be used by individuals with lactose intolerance

SANEA PKU Infant Formula is a phenylalanine-free infant formula. It consists of a phenylalanine-free amino acid mixture, carbohydrates and a fat blend containing long chain polyunsaturated fatty acids (LCP), and is supplemented with minerals, trace elements and vitamins.

Indication: For the dietary management of Phenylketonuria and Hyperphenylalaninemia in infancy.

Recommended dosage: Dosage depends on age, body weight and individual metabolic condition of the infant. The dose of Sanea PKU Infant Formula is to be monitored and adjusted by the physician regularly.

Use: The daily amount required should be divided into 3 to 5 single portions and should be taken mixed with breast milk or normal infant formula in calculated amounts. Diets with Sanea PKU Infant formula must contain adequate amounts of energy, essential fatty acids, and phenylalanine to meet daily requirements.

Lot number/Best before:
see bottom of can

PREPARATION:

1. Pour the required volume of boiled water (cooled to 50°C) into a bottle.

2. Add a measured dose of the product.

3. Close the bottle and shake until the powder is completely dissolved.

Standard dilution:

13g of powder (3 level scoops) into 90ml of water

NOTE:

- Formula remaining in the bottle after one hour of feeding should be discarded. Formula must not be rewarmed.
- The powdered infant formula is not sterile.
- Make sure your baby's teeth are cleaned before bedtime.

Store in a cool, dry place, away from light.

Always close the can after use.

Once opened, use within 1 month.

Packaged in a protective atmosphere.

This table should only be used as a guide.
Feed your children according to their individual needs or as advised by a Doctor.
